AIR BAGS

- Air bags are:
- Easy to use
 - Durable
 - Recyclable
 - AAR approved

AIR BAGS

AIR BAGS are inexpensive, easy-to-install bracing products, which fill voids to provide load securement. Available in a full spectrum of sizes, using kraft paper and/or polywoven material, these air bags adhere to AAR performance levels and require minimal labor and warehouse storage space.

BUF-BAG® was designed as a user-friendly, one piece application, providing additional strength and support for load stability and securement of larger voids. Each BUF-BAG® is custom for your shipment and comprised of a durable air bag sandwiched between two pieces of dunnage.
