LOAD PROTECTION IS IN THE BAG

STOPAK SQUARE BAG®

Covering more surface area than its standard counterparts, STOPAK SQUARE BAG® eliminates the need for additional void fillers by independently filling extra-large voids of 16" to 30". The lightweight, yet durable construction, allows the perfect balance between functionality and strength to protect your delicate cargo during transit.

- Simple installation
- Fills voids from 16" to 30"
- Saves valuable warehouse space
- Durable polywoven outer shell
- Use in wet or dry conditions
- Vast variety of sizes for the perfect fit

Call Sunrise today to request a demonstration. **(800) 748-6529**

EASY TO POSITION AND INFLATE

To begin the simple installation of the STOPAK SQUARE BAG®, remove the backing from the double-sided adhesive strips and position the deflated dunnage bag between the product. Inflate the SQUARE BAG using the newly developed STOPAK inflator with built-in L.E.D. gauge, which ensures the correct inflation level every time. Once inflated properly, the bag is firm and ready to provide securement against load shift.
